DETAILED ACTION

1. The amendment filed on 12/20/04 has been entered.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,7, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukumoto et al. (WO200079288A1).

Fukumoto et al. discloses a semiconductor device comprising a flexible semiconductor chip including an element forming region 7 where a semiconductor element 35-36 is formed and an element non-forming region 11-18 where a semiconductor element is not formed, each of the element forming region 7 and the element non-forming region 11-18 being provided on a front surface of a silicon substrate, a groove formed in a portion of a rear surface of said silicon substrate

Art Unit: 2826

corresponding to said element non-forming region 11-18, wherein said groove has a substantially uniform width from a bottom portion to an opening portion of said groove, a plurality (4) of said grooves are formed, and at least two of said grooves are formed parallel to each other, wherein a plurality of said element forming regions 7 are isolated from each other, and said element non-forming region 11-18 is a region sandwiched between said element forming regions 7, and wherein said groove does not extend all the way through the silicon substrate, so that the semiconductor chip is flexible (note the flexing action in figures 9A-9B). Note figures 6-8, 9A, and 9B of Fukumoto et al.

Response to Arguments

Applicant's arguments with respect to claims 1-3,7, and 12 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

4. Claims 4-6 and 13 are allowable are allowed over the references of record because none of these references disclosed or can be combined to yield the claimed invention such as a semiconductor device having an element forming region where a semiconductor element is formed and an element non-forming region where a semiconductor element is not formed, on a front surface of a silicon substrate, comprising a groove formed in a portion of a rear surface of said substrate corresponding to said element non-forming region, wherein said grooves are formed to extend in directions crossing each other, as recited in claim 4, or said semiconductor device, bonded to a **curved** bonding substrate, as recited in claim 13.

Art Unit: 2826

5. Claims 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
